

Cenotech Solutions announces Bonitasoft partnership

Boston, October 7, 2014/Cenotech Solutions LLC/- Cenotech Solutions LLC announces their partnership with business process management software vendor Bonitasoft.

This new relationship provides Cenotech with an exciting new capability that compliments their industry leading consulting practice supporting small to large financial service providers located throughout North America and globally Utilizing Bonita BPM, Cenotech will continue working to deliver solutions that help automate and provide insight into our client's business processes.

"We are very excited to enter into this strategic relationship with Bonitasoft. Bonitasoft's vision is that every organization, independent of size, industry, or location, deserves access to empowering technologies that improve operational efficiency. This philosophy aligns perfectly with Cenotech's approach to working with our clients. We have always worked to find ways to enhance our client's business processes, being more efficient and supporting operations teams in their daily workflows", states Mike Lauritzen, Principal at Cenotech. With Bonita BPM we can continue to innovate for our clients with a framework that provides many of the technical "hooks" that we would have had to build ourselves in the past, providing faster implementations, states Ross Sigmund, Principal of Cenotech. Bonitasoft CEO Miguel Valdes goes on to state that "Bonita BPM provides our consulting partners the opportunity to create "Living" business process models that can focus a team on the work that adds the most value to the business. We are thrilled to have Cenotech onboard."

About Cenotech Solutions LLC

Cenotech Solutions is a boutique IT consulting services firm. We specialize in providing business and technical expertise for the middle and back office for the financial services industry. Our expertise lies in a deep understanding of the information management and information flow requirements – how data is sourced and stored, where it is utilized and how it is integrated across the various applications and how business and operations use the data within the operating environment.

About Bonitasoft

Bonitasoft democratizes business process management (BPM) by bringing a flexible yet powerful BPM suite to organizations of all sizes and industries. Bonitasoft and its open source community deliver an unmatched ecosystem of connectors for nearly any application and/or system. With Bonitasoft, organizations can model, automate, and optimize process workflows in Finance, Human Resources, Marketing & Sales, Supply Chain, E-Government, and more. As the world's fastest-growing BPM provider, Bonitasoft has more than 2.75M downloads, 975 customers and a community of more than 60,000 contributors.
